

A B S T R A C T

A REAR TRUNK LID FOR A VEHICLE HAVING A FOLDABLE ROOF

5 The lid (1) for a rear trunk (2) of a vehicle having
a roof (3) foldable into the trunk (2) is connected to
the bodywork (6) by means (7, 10) disposed at the front
edge (4) and at the rear edge (5) of the lid (1) and
whose function is either to lock or to hinge the lid (1)
10 in a manner such that said lid can open either from the
front backwards or from the rear forwards, and control
means (8) cause the lid (1) to open in either of its
opening directions or to be closed. According to the
invention, the control means (8) comprise at least one
15 articulated arm (9) and an actuator (22) which is
connected to the articulated arm (9) and to the bodywork
(6), and which is adapted to move the articulated arm (9)
and the lid (1).
